SKILLS

Frontend

React Next.js JavaScript HTML/CSS

Tailwind

Backend

Node.js Express MongoDB

Tools & Workflow

Git GitHub VS Code Postman

Figma

LANGUAGES

Persian Native

English Professional

EDUCATION

Associate Degree, Software Engineering

Currently continuing studies alongside hands-on project work.

Turning Ideas Into Clean And Functional Web Experiences

I design and build modern web applications that are fast, reliable, and built to scale. I build fast and scalable web apps with a strong focus on clean UI and performance — every decision is driven by real-world usability, not just visuals. From architecture decisions to UI details, I focus on solutions that are maintainable and aligned with real business goals.

Remote-Friendly

Long-Term Product Quality

Full-Stack
React & Node.js

Remote Ready

What I Focus On

Performance
Fast-loading apps using modern optimization techniques.

Accessibility
Inclusive, usable interfaces for everyone.

Code Quality
Clean, documented, well-tested codebases.

Code Splitting
Reduced load times via smart bundling strategy.

Responsive Design
Smooth, consistent UX across every device.

Modern Techniques
React, Next.js and Tailwind for scalable apps.

Selected Projects

Finora
Personal Finance Dashboard

A premium finance dashboard focused on budgeting, analytics, transaction management, and real-time financial insights.

✓ Real-time charts with a clean, data-dense dashboard layout

React Node.js MongoDB

CineVerse
Movie Discovery Platform

Discover trending movies, explore detailed information, manage watchlists, and enjoy a cinematic browsing experience powered by TMDB.

✓ Live TMDB integration with search, filters, and watchlists

React TMDB API Express

JobPilot
Job Application Manager

Track job applications, interviews, offers, and career progress with a clean productivity-focused dashboard.

✓ Kanban-style stage tracking from applied to offer

React MongoDB Express
